Subject to the Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. These proportions can vary substantially depending upon the perception of the fund manager; the intention being at all times to seek to protect the interests of the Unit holders. Such changes in the investment pattern will be for short term and for defensive considerations only. In the event of deviations, the fund manager will carry out rebalancing within 30 Days. Where the portfolio is not rebalanced within 30 Days, justification for the same shall be placed before the Investment Committee and reasons for the same shall be recorded in writing. The Investment Committee shall then decide on the course of action. However, at all times the portfolio will adhere to the overall investment objectives of the Scheme.

Investment Strategy The Scheme aims to generate long term capital appreciation by investing in a dynamic mix of equity and equity related instruments across market capitalizations. The Scheme would invest in companies based on various criteria including sound professional management, track record, industry scenario, growth prospects, liquidity of the securities, etc. The Scheme will emphasise on well managed, good quality companies with above average growth prospects. There will be no particular bias towards any market cap size or any sector. The Scheme may also invest a certain portion of its corpus in foreign securities.

The portfolio will be built utilising a bottom-up stock selection process, focusing on appreciation potential of individual stocks from a fundamental perspective. The AMC employs a "Fair value" based research process to analyse the appreciation potential of each stock in its universe (Fair value is a measure of the intrinsic worth of a company). The universe of stocks is carefully selected to include companies having an efficient business model and enjoying sustainable competitive advantages as compared to their competitors, and are able to compound consistently.

The scheme by utilising a holistic risk management strategy will endeavour to manage risks associated with investing in equity markets. The scheme has identified the following risks and designed risk management strategies, which are embedded in the investment process to manage these risks.

- Quality Risk - Risk of investing in unsustainable / weak companies.
- Price Risk - Risk of overpaying for a company.
- Liquidity Risk - High Impact cost of entry and exit.
- Concentration risk - Invest across the market capitalization spectrum and industries/sectors.
- Volatility Risk - Volatility in price due to company or portfolio specific factors.
- Event Risk - Price risk due to a company / sector specific or market event.

The scheme may also seek participation in foreign instruments to achieve optimal portfolio construction.

Risk profile of the scheme

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment.

Scheme specific Risk Factors are summarized below:

Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal. Subject to necessary regulatory approvals and within the investment objectives of the Scheme, the Scheme may invest in overseas equity markets which carry risks related to fluctuations in the foreign exchange rates, the nature of the securities market of the country, repatriation of capital due to exchange controls and political circumstances.

Risks associated with investments in Equity and Equity related instruments:

Investments in equity and equity related securities involve a degree of risk and investors should not invest in equity schemes unless they afford to take the risk of losing their investment. Equity instruments by nature are volatile and prone to price fluctuations on a daily basis due to both micro and macro factors. Volatility in the capital markets, changes in policies of the Government, taxation laws or any other political and economic development may negatively affect the prices of the securities invested in by the Scheme. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of some of the investments. The Scheme may inter-alia also may be exposed to the risk arising from over exposure to few securities/ issuers/sectors.

Risks associated with investing in Securities Segment and Triparty Repo trade settlement:

The mutual fund is exposed to the extent of its contribution to the default fund of CCIL at any given point in time i.e. in the event that the default waterfall is triggered and the contribution of the mutual fund is called upon to absorb settlement/default losses of another member by CCIL, the scheme may lose an amount equivalent to its contribution to the default fund.

Risks associated with transaction in Units through stock exchange(s):

In respect of transaction in Units of the Scheme through Bombay Stock Exchange ("BSE"), National Stock Exchange ("NSE") and / or Indian Commodity Exchange Ltd. ("ICEX"), allotment and redemption of Units on any Business Day will depend upon the order processing / settlement by NSE, BSE and / or ICEX and their respective clearing corporations on which the Fund has no control.

Risks associated with Restrictions on Redemption:

The Trustee and the AMC may impose restrictions on redemptions when there are circumstances leading to a systemic crisis or event that severely constricts market liquidity or the efficient functioning of markets. Accordingly, such restriction may affect the liquidity of the Scheme and there may be a delay in investors receiving part of their redemption proceeds.

Please refer the SID for further details.

Creation of segregated portfolio

In case of default of either the interest or principal amount, the Scheme may create segregated portfolio of money market instruments in terms of applicable SEBI regulations/ circulars.

Under the Prevention of Money Laundering Act, 2005 ("PMLA"), all intermediaries including mutual funds are required to obtain sufficient information from their clients in order to identify and verify the persons who beneficially own or control the account. SEBI circular dated January 24, 2013 on identification of Beneficial Ownership has prescribed a uniform approach to be followed for determination of beneficial owners. A 'Beneficial owner' is defined as a natural person/s who ultimately own, control or influence a client and/or persons on whose behalf a transaction is being conducted, which includes persons who exercise ultimate effective control over a legal person or arrangement.

All categories of investors except individuals, company listed on a stock exchange or majority owned subsidiary of such company, are requested to provide details about beneficial ownership in the Application Forms for all their investments. The Fund reserves the right to reject applications/restrict further investments or seek additional information from investors who have not provided the requisite information on beneficial ownership. XVIII. FATCA DETAILS:

The Foreign Account Tax Compliance Act is a United States (US) federal law, aimed at prevention of tax evasion by US Citizens and Residents ("US Persons") through use of offshore accounts. The FATCA provisions were included in the HIRE Act enacted by the US legislature. FATCA is designed to increase compliance by US taxpayers and is intended to bolster efforts to prevent tax evasion by the US taxpayers with offshore investments.

As per SEBI circular no. CIR/MIRSD/2/2014 dated June 30, 2014, the Government of India and the US have reached an agreement in substance on the terms of an Inter-Governmental Agreement ("IGA") to implement the FATCA provisions, which have become globally applicable from July 1, 2014. FATCA requires enhancement of due diligence processes by the Foreign Financial Institutions ("FFI") so as to enable identification of US reportable accounts.

The Fund/ Asset Management Company ("the AMC") are likely to be classified as a FFI under the FATCA provisions in which case the Fund /the AMC would be required, from time to time, to (i) undertake necessary due diligence process by collecting information/ documentary evidence of the US/non US status of the investors; (ii) disclose/report information as far as may be legally permitted about the holdings/investment returns pertaining to reportable accounts to the US Internal Revenue Service and/or such Indian authorities as may be specified under FATCA or other applicable laws and (iii) carry out such other activities as prescribed under the FATCA provisions, as amended from time to time. FATCA due diligence will have to be directed at each investor/unit holder (including joint investors) and on being identified as a reportable person/specified US person, all the folios will be reported. Further, in case of folio with joint investors, the entire account value of investment portfolio will be attributable under each such reportable person. Investors/Unit holders would therefore be required to furnish such information to the Fund/AMC, from time to time, in order to comply with the reporting requirements stated in the IGA and or circulars/guidelines issued by SEBI/AMFI in this regard.

The impact of FATCA is relevant not only at the point of on-boarding of the investors but also throughout the life cycle of the investor account / folio with the Fund. Hence investor(s) should immediately intimate the Fund/AMC, in case of any change in the FATCA related information provided by them at the time of initial subscription.

The Fund/AMC reserves the right to reject any application or compulsorily redeem the units held directly or beneficially in case the applicant/investor fails to furnish the relevant information and/or documentation or is found to be holding units in contravention of the FATCA provisions.
